I help functional and precision medicine doctors get new patients consistently, so they can spend their time on medicine instead of marketing. The ACRR System is a four-part framework built specifically for concierge private-pay practices.

USE	FONT	SIZE	COLOR
Body Copy (violet bg)	DM Sans	17px	--mid-vt

My background is web design, mostly local service businesses with some wellness mixed in. I got good at building sites that looked right and converted reasonably well. But I kept seeing the same pattern after launch: the practice had a new site and still wasn't getting the patients they expected.

ACRR SYSTEM GRID

ATTRACT

Draw in the right patients.

Build a clear online presence that reaches patients who value root-cause medicine.

CONVERT

Turn interest into booked appointments.

Move interested leads into committed new patients through optimized funnels.

RETAIN

Keep ideal patients engaged.

Build long-term relationships with nurture systems that keep patients connected.

REFER

Turn patients into advocates.

Satisfied patients naturally refer others who share their philosophy.

06 — LAYOUT SYSTEM

Pages alternate between violet and light sections. No section uses the same background twice in a row. Two-column 50/50 grid is the primary layout. Sections are full-width, separated by 1px rules.

SPACING SCALE

Section padding (desktop): 100px top/bottom. Padding (mobile): 48–60px. Max content width: 1100–1280px.

PRIMARY GRID — 2 COLUMN, 0 GAP (2PX RULE)

Columns use 2px gap (not a CSS gap value — two separate full-bleed blocks placed 2px apart). Sharp edges, no rounded corners on any grid cell.

Three words: **Direct. Warm. Quietly confident.** All three at once. Direct without warm is cold. Warm without direct is soft. Confident without warm is arrogant.

WRITE THIS

- ✓ Short sentences. Then a slightly longer one. Then short again.
Vary length, lean short
- ✓ Specific nouns over generic ones.
"A menopause specialist" not "a healthcare provider"
- ✓ Concrete verbs over abstract ones.
"Ranks on Google" not "achieves visibility"
- ✓ Active voice throughout.
"We build custom sites" not "Custom sites are built"
- ✓ Name the problem plainly.
"Your contact form isn't visible on mobile"
- ✓ One idea per sentence.
If it has three commas, it's probably two ideas

NOT THIS

- × Em-dashes anywhere.
Hard rule. Use a comma, period, or colon instead.
- × Triple adjective lists.
"Clean, intentional, and strategic" — one is sharper.
- × "Not just X, but Y" constructions.
An AI tell. Just say the thing.
- × Spa/coach language.
Elevate, transform, journey, manifest, soul-led
- × Borrowed proof points.
No client results that don't exist yet
- × "Cash-pay" anywhere.
Always: private-pay
